

Updating Resident Profiles in eAccreditation

In order for the resident achievement measures to populate in the Outcomes Data tab, ensure you have updated each resident for a cohort. This can be done by navigating to the 'Residents' tab and clicking on each resident profile.

Updating Resident's Completion and Employment Status

- Within each Resident's profile, update the resident's status and click 'save'

The image shows two sections of a resident profile form. The first section is titled 'Student Status' and has a red arrow pointing to the 'Graduated' option. The second section is titled 'Completion Placement (If this information is not available, you can answer at a later time)' and has a red arrow pointing to the 'Employed as an Athletic Trainer' option.

Student Status

- In Progress
- Leave of absence (academic)
- Dropped out non-academic
- Dropped out academic (including dismissal)
- Transferred out
- Graduated
- Deceased
- Leave of absence (Other-medical, military service, family emergency)

Completion Placement (If this information is not available, you can answer at a later time)

- Employed as an Athletic Trainer
- Employed other than as an Athletic Trainer
- Employed as an Athletic Trainer and in a degree or residency program
- Not Employed, due to military service
- Not Employed, due to enrollment in another degree program
- Not employed
- Do Not Know
- Deceased

Resident Achievement Measures

Resident Employment/Placement Rate

Graduate employment/placement rate: Percentage of residents within 6-months of program completion that have obtained positions in the following categories: employed as an athletic trainer, employed as other, and not employed.

Employment/Placement rate is calculated as: the sum of residents with a Employed as an Athletic Trainer or Employed as an Athletic Trainer and in a degree or residency program then divided by the total number of residents who have graduated (excluding students with a Not Employed, due to military service and Deceased).

Resident Completion Rate

Completion rate (modified from the United States Department of Education): Measures the progress of residents who began their studies as full-time residents by showing the percentage of these residents who complete their program within a 150% of "normal time" for completing the program in which they are enrolled.

Completion rate is calculated as: the sum of residents with a Graduated status divided by the total number of residents in the cohort (excludes residents with a deceased or Leave of Absence (medical) status).

Resident Retention Rate

Retention rate (modified from United States Department of Education): Measures the percentage of students who have been admitted to the professional residency program who return to the institution to continue their studies the following year. For one-year residency programs, the program will not be required to report retention rate.

Retention rate is calculated as: the sum of residents with a In Progress and Graduated status divided by the total number of residents in the cohort (excludes residents with a deceased or Leave of Absence (medical) status).

Please note: Starting with 2020-21 the system will now automatically calculate the retention rate for programs. All information prior to 2020-21 will display as n/a. Please ensure student cohort information is updated each year to ensure accurate information is reflected in the outcomes tables.
