

RESIDENCY PROGRAMS

Athletic training residency programs are non-degree programs that provide structured, practice-based curricula in an identified specialty area of practice to those who are already credentialed athletic trainers. These programs are designed to prepare clinical specialists by building upon and expanding an athletic trainer's knowledge and experience in a specialty area of clinical practice.

RESIDENCY PROGRAM OVERVIEW

The Typical AT Residency Program at a Glance:	
Sponsoring Organization	Physician Practice/Clinic
Specialty Area of Clinical Practice	Orthopedics
Residency Length	12 Months
New Learners Admitted	2
Learner Enrollment by Gender Ratio	4:1, Female to Male
Learner Enrollment by Race Ratio	4:1, White to All Other Races
Learner to Program Personnel Ratio	1:6

ACCREDITATION STATUS

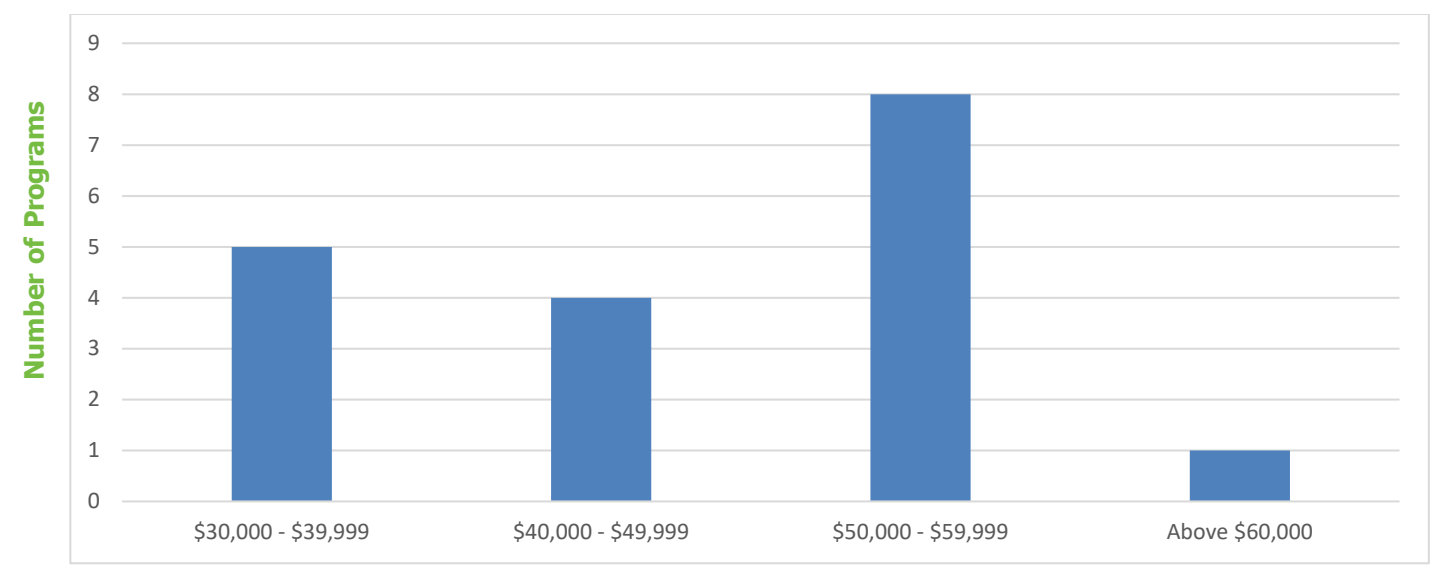

During the 2024-2025 academic year, there were a total of 19 CAATE accredited residency and fellowship programs, an increase of four programs from last year.

RESIDENCY PROGRAMS

Salary

Programs were asked to report which salary range their learners are paid in while completing the program. Eight programs reported a salary range of \$50,000-\$59,999 for learners while completing the program.

Learner Salary During Program

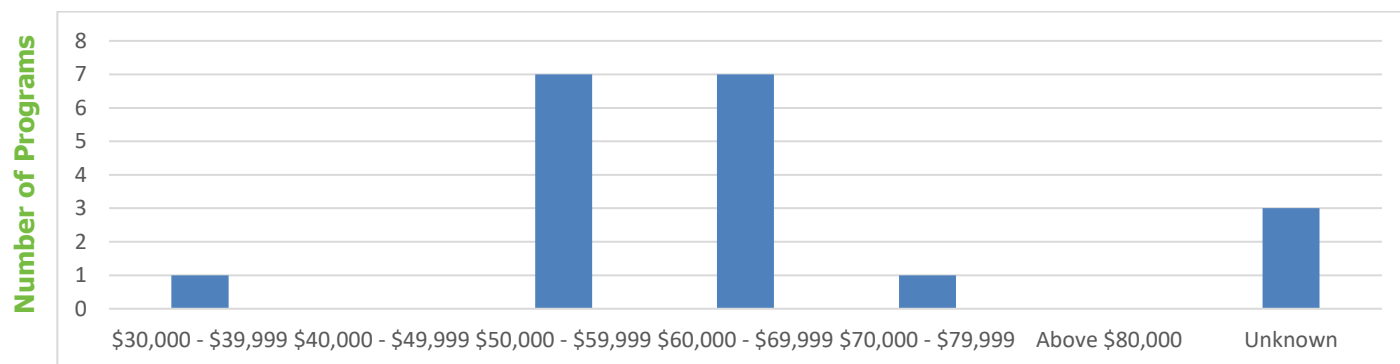

N=18, 1 program did not report out salary information.

RESIDENCY PROGRAMS

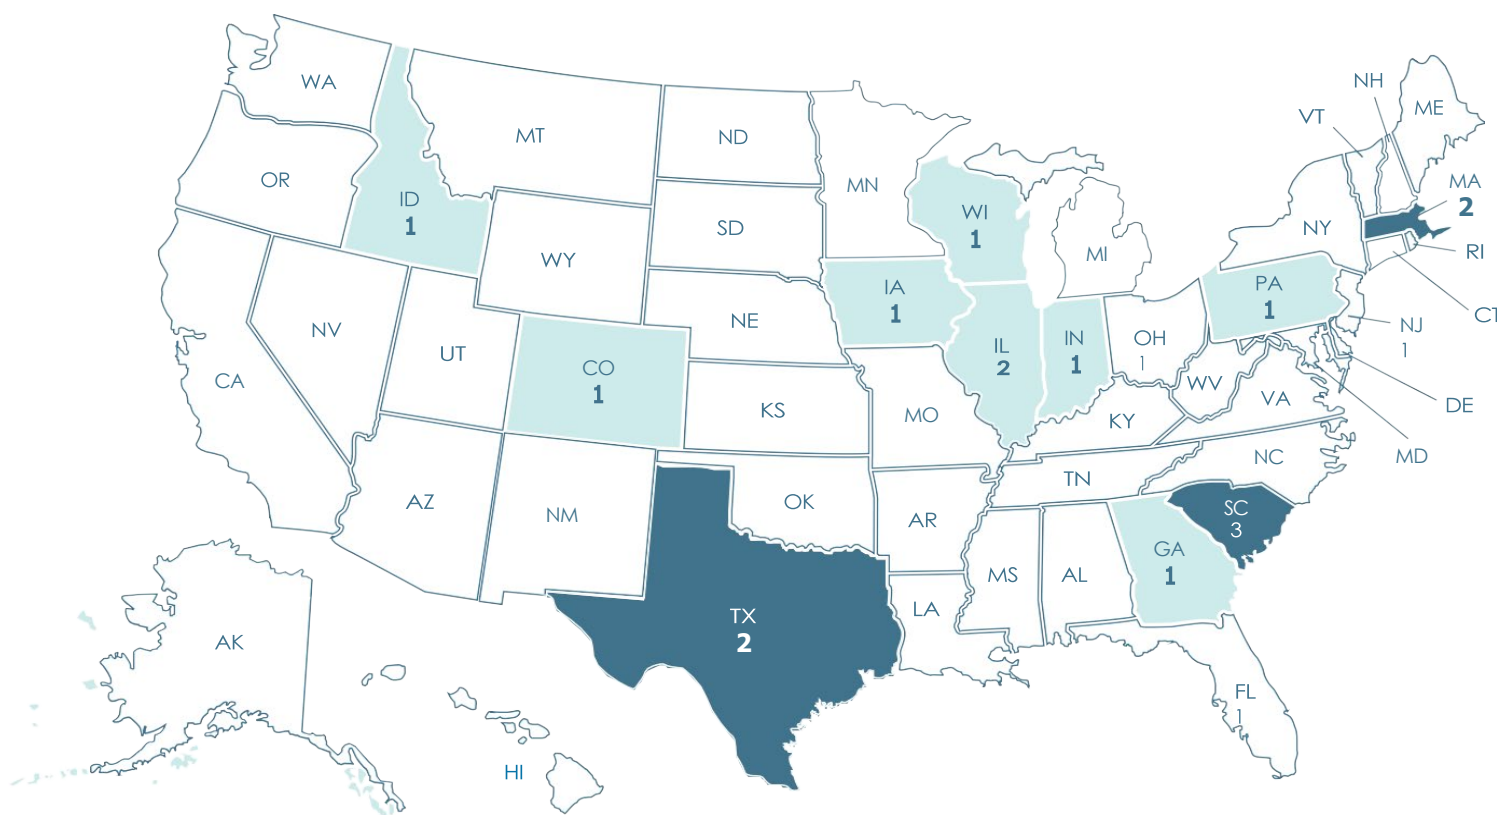

Programs were also asked to provide the average salary range made by learners upon employment following completion of the program. Seven programs reported an average salary range of \$60,000-\$69,000 for learners following completion of the program.

Learner Salary Range Following Program Completion

19 programs reported out data for salaries following completion

PROGRAM LOCATIONS BY STATE

RESIDENCY PROGRAMS

SPONSORING ORGANIZATION AND SPECIALTY AREA OF PRACTICE

The majority of programs are sponsored by physician practices/clinics or medical centers/hospitals. Twelve of the 19 programs are offered in the specialty area of orthopedics.

Specialty Area of Practice

PROGRAM LENGTH

Ten of the programs report a length of 12 months, with a range of 12 to 24 months.

Employment

Program directors were asked to provide the percentage of learners who completed the program during the reporting period that ultimately gained employment within the specialty area of practice. All accredited programs reported that 100% of learners completed the program, with 96% gaining employment in the specialty area of practice.
